

6. DATABASE AI LOCAL COMMUNITIES & REFERENTS

LATAM SingularityNET Community

6. DATABASE _ AI LANDSCAPE & LOCAL REFERENTS

Argentina, Colombia & Mexico

This database serves as a comprehensive repository, capturing the essence and evolution of AI in Mexico, Argentina, and Colombia. It not only documents the present landscape but also offers a glimpse into the potential collaborations and influencers shaping the future trajectory of artificial intelligence in the region. The LATAM SingularityNET Community database will continue to incorporate information and data according to the criteria established throughout the development of the proposal in its phase #1 and its extension over time in the long-term strategy, evolving with the ecosystem, reinforcing the contacts with Local and regional AI Key Communities, local Referents and influencers creating alliances and working for the expansion of SingularityNET Potential Partners. In the next phase, the proposal includes the objective of digitizing the information and making it accessible on the community's site.

Developed by:

Ines Gavina / Marketing and Communication Manager at @energiasocial

Content creator and creative brand producer. Working in expanding the transformative power of renewable energy and social businesses across the LATAM region.

Guillermo Lucero / Founder and CEO at @energiasocial. Specialist in renewable energy and sustainable social development strategies. Working in the development of new business models for technology innovation applied to comprehensive triple impact strategies with @mercadolibre in the LATAM region.

for **LATAM @SingularityNET Community**

Creating and growing a vibrant and high-spirited community of talented LATAM innovators for decentralized AI revolution

Introduction

Welcome to the burgeoning landscape of artificial intelligence in the LATAM region, where Mexico, Argentina, and Colombia emerge as pivotal players. This database encapsulates the dynamic AI ecosystem, highlighting three crucial facets for this first phase of our LATAM SingularityNET Community Proposal.

AI Key Communities:

Within the vibrant tapestry of AI, communities act as the lifeblood, fostering innovation and collaboration. In Mexico, Argentina, and Colombia, various burgeoning AI communities bring together enthusiasts, experts, and innovators, propelling the AI dialogue forward. From tech hubs to academic institutions, these communities serve as crucibles of knowledge exchange, incubating groundbreaking ideas and initiatives.

Regional & Local Referents and Influencers:

The AI landscape in LATAM is shaped by visionary leaders, influencers, and referents whose contributions pave the way for transformative advancements. Notable figures from Mexico, Argentina, and Colombia wield influence through their expertise, thought leadership, and pioneering endeavors, shaping the discourse and direction of AI in the region. Their insights and actions catalyze progress and set benchmarks for the industry.

SingularityNET Potential Partners:

SingularityNET, a pioneering AI platform, seeks collaboration and partnership opportunities across the LATAM region. Identifying potential partners in Mexico, Argentina, and Colombia is crucial in expanding the network's reach and impact. These partners, with their expertise, resources, and shared vision, could catalyze the development and deployment of AI solutions, furthering SingularityNET's mission.

Argentina

AI Key Communities:

SAIA

<https://saia.ar/>

+54 9 11 6408 1743

administracion@saia.ar

SAIA is an organization whose main objective is to promote the advancement, development and applications of artificial intelligence in Argentina. We work closely with experts, academics and professionals to drive innovation and disseminate knowledge in this field. What sets SAIA apart is our close relationship with a foundation. Being part of a foundation, we have a broader vision and an additional commitment to ethics and social responsibility in the development and application of artificial intelligence. In addition, our network of collaborators and allies allows us to access a wide range of resources and experiences in this field. SAIA is committed to promoting transparency in the development and application of artificial intelligence. We seek to encourage openness and dissemination of information about the algorithms, models and data used in AI systems. We promote public understanding of artificial intelligence and its implications, and advocate for accountability and clear, justifiable decision-making.

ANYONE AI

www.anyoneai.com

<https://www.linkedin.com/school/anyone-ai/>

“We invest in people from Latam to bridge the talent gap in AI.”

ANYONE AI is a team of AI / ML experts and second-time entrepreneurs, members of the founding team at Deep Vision AI (acquired in early 2020) that had worked with many Fortune 500 companies completing multiple projects in the early days of AI while leveraging remote talent from LATAM.

IAAR

<https://iaar.site/>

Argentine Artificial Intelligence Foundation: It is a non-profit organization that promotes the development of a sustainable AI ecosystem to generate impact in Argentina and the world. The foundation encourages dialogue on the topic, as well as the dissemination, promotion and linking of AI topics and projects.

SADIO

<http://www.sadio.org.ar>

Argentine Computer Science Society (SADIO): Created in 1960, SADIO's objectives are to identify, unify and expand knowledge of the sciences and techniques of information processing, as well as the practice of objective and quantitative methods for decision making. It also conducts numerous courses and workshops that mainly focus on data analysis through machine learning, AI applications and development of programming capabilities, among others.

CHEQUEADO

<https://chequeado.com/acerca-de-chequeado/>

It is considered a reliable organization when it comes to data verification. Together with Africa Check, Full Fact and the UK's Open Data Institute, it received funding from Google to use AI to detect disinformation and fake news campaigns.

AI Key Communities:

IA2030Mx

<https://www.ia2030.mx/>

We strengthen the ecosystem and develop an artificial intelligence agenda for Mexico. IA2030Mx is a multi-sector coalition made up of professionals, academic institutions, companies, startups, public agencies and other key actors in the digital and Artificial Intelligence (AI) ecosystem in Mexico.

LATAM AI

<https://latam-ai.com/>

Impulse Data & AI works to promote Latin America as an area of global leadership in AI. Has made a 5-year commitment to help support the following. An annual event a year that brings together stakeholders from academia, industry and business. Education and professional development Identification of business opportunities for the use of AI Academic institutions, other local “Meet-ups”, organizations and community creators. Objectives; Hiring and creating talent. Diversity and inclusion by initiatives to support women in AI and STEM. The members of this movement have been working since the beginning of 2018 under a philosophy of co-responsibility of government, academia, industry and civil society, seeking to ensure that Mexico is not left behind in the 4th Industrial Revolution, strategically take advantage of the benefits of AI and mitigate the possible ethical and social risks.

FAIR LAC JALISCO

<https://fairlac.iadb.org/hub/jalisco> / <https://linktr.ee/fairlacjalisco>

fAIR LAC Jalisco is an initiative led by the IDB Group, the Tecnológico de Monterrey in Guadalajara, the Government of Jalisco and C Minds, which aims to take advantage of the responsible and ethical adoption of Artificial Intelligence for social good in Jalisco, through the articulation of academia, civil society, public sector and private sector to develop capabilities, enhance the social reach of AI and take advantage of the impact of technology for more efficient social services.

CMINDS

<https://www.cminds.co/ai-for-good-lab>

The AI for Good Lab to explore how to strengthen Mexico and the Latin American region in the face of the international AI and Tech Revolution, boosting the ecosystem, deepening ethical conversations, and contributing more ethical, fair, and inclusive AI policy. Advisors and collaborators of the initiative led by the Social Sector of the Inter-American Development Bank (IADB). fAIr LAC works in the Latin America region, promoting AI for impact and creating more resilient communities. Working hand in hand with the Inter-American Development Bank (IADB), the State Government of Jalisco and Tec de Monterrey, are piloting a comprehensive AI center in Jalisco, Mexico with the objective of accelerating the responsible use of AI for social policies and impact entrepreneurship.

CUDI MÉXICO

<http://virtual.cudi.edu.mx/>

Artificial Intelligence Community. The mission of the Community is to constitute itself as the most relevant link and means of information/collaboration/exchange between the different groups that study any of the disciplines derived and auxiliary to Artificial Intelligence, as well as those communities or organizations that develop applications and that require or benefit from advances in this discipline.

There are also social organizations such as The Data Pub, a community focused on data science, AI.Saturdays and De Cero a Ciencia de Data, groups based in Guadalajara. Global Shapers Mexico City Hub general perception survey on AI; the WEF youth community, which explored and identified examples of AI initiatives for social good; and TalentLand.

Among the most notable emerging companies are Prosperia Labs, Artificial Nerds, Quantum Labs and other established companies such as Nearshore Solutions, Bluemessaging and Territorium Life.

ADDITIONAL INFORMATION

<https://es.wired.com/articulos/este-sera-el-primer-laboratorio-de-inteligencia-artificial-de-america-latina-y-esta-en-mexico>

G.AI.L was conceived as a link between research, education and the practical application of Generative Artificial Intelligence. This is a "live laboratory", a space that recreates real-world situations where users, local, national and international business leaders, including government representatives and community members, can collaborate together to conceive, test and validate new technologies, services and products. It is called G.AI.L and it is the first Generative Artificial Intelligence Laboratory in Mexico and Latin America. The School of Engineering and Sciences of the Tecnológico de Monterrey, Guadalajara campus, has established a collaboration with Wizeline, a leading global company in technology services. Together, they have inaugurated this pioneering Laboratory, a milestone in the region by merging Wizeline's knowledge and experience in technology and artificial intelligence with the outstanding faculty, researchers and students of Tecnológico de Monterrey.
