2. MANIFESTO _ LATAM SINGULARITYNET COMMUNITY

We are honored and thrilled to be part of the SingularityNET AI decentralizing project and Community of brilliant pioneers and bold creators. The LATAM SingularityNET Community is a fully Community-led initiative that was born with the SingularityNET Community vote and support in this last Deep Funding Round 3 with the specific objective of creating awareness around SingularityNET AI decentralizing project in the LATAM region, educate, safely guide and onboard the LATAM talent into the Deep Funding program and SingularityNET ecosystem.

Aware of LATAM's thriving digital and technological-driven startup ecosystem and its AI and blockchain technology increasing demand for integrated solutions, we will work hard to raise the region's awareness about the SingularityNET platform and Deep Funding Program's decentralized mission and vision. Our main efforts will be in creating a vibrant and high-spirited LATAM Community, a central hub for valuable information and at the same time a supporting and inclusive environment where all voices are heard and valued. For building a decentralized AGI and a beneficial and ethical Singularity, we first need to build a cooperative and decentralized Community where individual talent and untapped innovators can flourish in real collaboration. We actively believe, it is the superpower of human bonds and friendships that will drive AGI potential for good in these challenging times to come, when humanity will finally face unpredicted and unimaginable changes and transformations in the Age of Singularities.

We will strive to uphold ethical standards and promote transparency in our work in an on-going and fully committed communication between LATAM SingularityNET Community, SingularityNET Foundation and Community and the Deep Funding program, throughout this wonderful journey we are about to start together. Knowing how hard building real people's engagement can be, we wanted to share our long-term commitment and our seed-based vision for this first phase challenging endeavor. Like a growing tree, the LATAM SingularityNET Community will need hard work and patience.

Thanks to everyone in the SingularityNET Community for your vote and support, we will work hard to rise to the occasion and challenges of this global village we now are and to meet the expectations of SingularityNET's brilliant leaders and Community of AI heroes. We will need you for this tree to grow strong and healthy and thrive and live for many years.

Developed by:

Ines Gavina / Marketing and Communication Manager at @energiasocial
Content creator and creative brand producer. Working in expanding the transformative power of renewable energy and social businesses across the LATAM region.

Guillermo Lucero / Founder and CEO at @energiasocial. Specialist in renewable energy and sustainable social development strategies. Working in the development of new business models for technology innovation applied to comprehensive triple impact strategies with @mercadolibre in the LATAM region.

for **LATAM @SingularityNET Community**
Creating and growing a vibrant and high-spirited community of talented LATAM innovators for decentralized AI revolution
